- Cavity fill is recommended

## How this affects your energy bills

An average household would need to spend **£2,843 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £1,123 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2024** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

## Heating this property

Estimated energy needed in this property is:

- 12,743 kWh per year for heating
- 1,957 kWh per year for hot water

## Impact on the environment

This property's environmental impact rating is F. It has the potential to be D.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

## Carbon emissions

<b>An average household produces</b>	6 tonnes of CO2
<b>This property produces</b>	7.8 tonnes of CO2
<b>This property's potential production</b>	3.7 tonnes of CO2
